Subject: Microsoft Settlement

Dear Justices,

I am a Mac Computer (Apple) User, but I also use Microsoft software. I believe the recent settlement proposal for the Microsoft lawsuit is fair and in the best interest of the end user--people like me. Microsoft has made a huge positive difference in the personal and business computer world. Their user friendly, practical applications have advanced the technology of computers faster than one could imagine! It's time to put this lawsuit behind us, and move forward. It has taken a long time to get to this point. Careful review and decision has been made. I would urge the court to follow through and confirm the decision.

Sincerely,

Joy Iris Staveley, Vice President
